Electricity and electrical systems clearly lend to the most dynamic component of facility systems. We understand that it is important for our clients to have the ability to rely on service providers that are not only technically strong, but our reliable, consistent and consultative. Tolly Electric offers a unique blend of technical aptitude with relationship driven project management. We commonly provide an array of upfront electrical consulting service in order to assist our clients with assessing the most cost effective electrical and energy management solutions.

Construction Services

We offer full electrical construction and renovation services pertaining to the following industries:

- Industrial - Manufacturing
- Commercial – Retail and Office
- Site infrastructure / Site Utility
- Residential

Commercial Maintenance

We assist our clients in helping to reduce ongoing maintenance cost while protecting liabilities with our ongoing proactive and preventative commercial electrical maintenance services. Our services include:

- Custom / Cost effective maintenance programs
- Night-Time Walk-Through Inspections
- Formal upfront assessments / Ongoing detailed property condition reports
- 24-hour emergency services
- Energy savings strategies

With our industrial clients, we have heavy experience working in operating facilities and understand completely how to incorporate our work operations that need to continue to run without interruption.

Energy Management

Tolly has a wealth of experience in developing and implementing alternative/renewable energy solutions such as solar, wind, and co-gen technologies. Whether the goal is to minimize energy consumption or reduce energy costs, Tolly actively assists our client in determining which technology best fits their needs, which incentives they can benefit from, and then design and install

the system to suit their projects and implement the most cost effective alternative energy strategies.

Tolly is a licensed Solar contractor and approved vendor of Southern California Edison and San Diego Gas and Electric. We offer in-house services to assist clients with mapping rebate and tax incentive strategies.

Lighting is often the biggest consumer of a facilities energy. Tolly has the experience and capabilities to create lighting solutions that minimize energy consumption while maximizing interior comfort. Further, CSI's capabilities include integrating advanced lighting/daylighting controls, utilizing recycled materials, and installing energy efficient fixtures.

Tolly Electric is a fully licensed, bonded and insured contracting company serving Southern California based clients. We provide electrical services for business and industrial developments, headquarters facilities, medical facilities, retail centers, universities, apartment complexes, and planned communities. Our services are managed by professionals, whom in addition to practical field experience, are certified in the state of California.

We care about our clients and our communities and we are active with civic efforts such as Olive Crest Homes and Services for Abused Children, Habitat for Humanity and various local schools.
